PROFESSIONAL SKILLS

Programming

Python, JavaScript, TypeScript, PHP, HTML5, CSS3

Frameworks

Django, Django REST Framework, React

Databases

SQLite, SQL

APIs & Authentication

REST APIs, JWT Authentication, API Integration

Tools

Git, GitHub, VS Code, Postman

Deployment

Vercel, Render

Other

Cloudinary, Responsive Web Development

CORE STRENGTHS

Software Development
Problem Solving
Debugging
Database Management
Team Collaboration
Technical Documentation
Continuous Learning

BENJAMIN MWASYA

COMPUTER SCIENCE STUDENT | FULL-STACK DEVELOPER

PROFESSIONAL SUMMARY

Computer Science student and aspiring full-stack developer with hands-on experience designing and developing web applications using Python, Django, Django REST Framework, React, TypeScript, JavaScript, HTML, and CSS. Experienced in building REST APIs, implementing authentication and role-based access, working with SQLite databases, integrating external services, and developing responsive user interfaces. Have developed practical systems including a smart university asset and maintenance management system, an AI-powered interview preparation platform, e-commerce applications, and other web applications. Strong problem-solving and debugging skills with practical experience using Git, GitHub, Postman, and modern web-development workflows.

EDUCATION

Bachelor of Science in Computer Science

Pwani University, Kenya

Relevant areas: software development, database systems, web development, systems analysis and design, computer programming.

PROFESSIONAL EXPERIENCE

ICT / Software Development Intern — Swahilipot Hub Foundation, Mombasa

May 2024 – Present

- Supported development and maintenance of digital platforms and web-based applications.
- Participated in frontend development and worked on components including navigation, information panels, and event/hackathon sections.
- Contributed to websites and digital platforms used for organizational and community activities.
- Participated in software testing, debugging, deployment, and troubleshooting.
- Used Git and GitHub for version control and collaborative development.
- Worked with team members to implement project requirements and improve application functionality.

SELECTED PROJECTS

Smart Maintenance & Asset Tracking System — Django, Django REST Framework, React, TypeScript, SQLite, JWT

- Developed a web-based system for tracking university assets and managing maintenance activities.
- Implemented roles for administrators, technicians, staff, and students, with authentication and role-based access.
- Built asset registration, tracking, maintenance requests, technician assignment, repair updates, feedback, activity logging, and analytics features.
- Developed REST APIs with Django REST Framework and connected them to a React/TypeScript frontend.

AI Smart Interview Preparation Platform — Python, Django, REST APIs, React, AI Integration, SQLite

- Developing an AI-focused platform for interview preparation, answer evaluation, interview history, resume analysis, and performance statistics.

ElectroMart E-Commerce Platform — React, JavaScript, HTML, CSS

- Built a responsive e-commerce interface with reusable React components, product-focused views, and interactive user experiences.

Attendance Management System — Django, Python, SQLite

- Developed a Django application for authentication and database-driven attendance management, including backend models, views, testing, and debugging.

Personal Portfolio & Weather Applications — React, Vite, JavaScript, REST APIs

- Designed responsive web applications, practiced API integration, asynchronous data handling, reusable components, and deployment workflows.
